

## PRODUCT INFORMATION

# STRETCH PREMIUM PU

Digital Print Material

**DESCRIPTION:** Heat seal material, specifically formulated for ink jet solvent and eco solvent based inks. The special formulation Premium PU is ideal for stretch fabrics including Lycra. **Polyester** backing.

**BASIC INFORMATION & APPLICATION INSTRUCTIONS:** Due to the many different base materials available on the market, the following heat transfer instructions are given as a guideline only:

- 1) Set Machine Temperature at 165°C
- 2) Pre-Press Garment for 3-6 seconds to remove moisture.
- 3) Remove Laminate Carrier.
- 4) Place Stretch Premium PU transfer in desired position.
- 5) Using Medium Pressure, heat apply for 5-7 seconds.
- 6) Remove carrier film while **hot**.
- 7) Re-Press using a cover sheet such as Parchment Paper, Kraft Paper or Teflon for a further 5 seconds.

**SUITABLE FOR:** All types of Lycra Materials, Spandex, Stretchable Fabrics, Cotton, Polyester, Poly-Cotton Blends. **Not** suitable for heavily dyed or dye sublimated materials especially Navy and Maroon.

**WASHING:** (Wait 24hrs after the heat transfer).

**TEMPERATURE:** 50°C Max - wash inside out - do not use bleach or other aggressive chemical agents.

**DRY-CLEANING:** No                      **TUMBLE DRY:** Not advisable.

**N.B.:** all information given in this sheet is based on our experience.

**We recommend to always perform a test before starting standard production.**
